Continuation Sh et (PTOL-303)

Continuation of 2. NOTE: The amendment of claims 15 and 16 to recite claim limitation "first layer of cultured fibroblasts cells which produce a layer of extracellular matrix" would require further consideration under 35 USC 112(1) regarding enablement issues. The scope of invention as claimed encompasses fibroblasts, which endogenously produces extracellular matrix comprising: (i) Fibrillar collagen (type I and type II) showing a packing organization of fibrils and fibril bundles exhibiting a quarter-staggered 67 nm banding pattern, (ii) decorin (iii) glycosnminoglycans, (iii) fibronectin, (iv) tenascin and (v) glycosnminoglycans. The specification as filed fails to disclose the synthesi of above mentioned extracellular components by cultured fibroblasts, wherein the fibroblasts has not been genetically modified to produce the extracellular matrix components.
